

Mobile Label Printers

PB22 | PB32 | PB50

- Industry's fastest 2, 3 and 4-inch rugged mobile label printers.
- Ultra-fast print speed with proven two to three times faster time-to-first-label than competitive products.
- Unique label gap and label take sensors improve productivity and reduce waste.
- Integrate seamlessly with Intermec mobile computers and software, including Intermec Terminal Emulation (ITE) and Intermec SmartSystems®.
- Remote monitoring and diagnostics via SmartSystems speed up problem resolution.

6822 Mobile Full Page Printer

- Available in mobile or fixed-mount configurations.
- Print high-quality customer receipts, invoices, load reports, transfers and other route accounting documents.
- Wireless printing via optional Bluetooth holder for Intermec CN3, CK61 or 700 Series mobile computers.
- Enhance mobility with handle for easy carrying and compact tray holding enough paper for full-day printing.
- Seat-mount strap secures printer in vehicles with bench seats.
- Optional, soft-sided carrying case stores invoices within sealed compartment inside case cover.

Barcode Scanners

With a complete family of barcode scanners ranging from handheld scanners, decoders to integrated scan engines, Intermec provides intuitive data capture for every scanning environment.

SF51

- True "hands-free scanning" with patent-pending, magnetic attach and release mechanism.
- Can be worn on the waist, wrist or chest.
- Interface with Intermec terminals without a base station via a wireless personal area network (PAN) radio based on Bluetooth™ communication protocol.
- Ideal for scan intensive applications.

SR30

- Automatic detection of different interfaces.
- Easy to install and reconfigure.
- Patented Intermec Vista linear imaging technology delivers fast, accurate scanning even with damaged or poorly-printed barcodes.
- Choice of desktop stand, wall mount holder or hands-free stand.
- Ideal for plug-and-play Point-of-Sale (POS) scanning and light industrial data capture.

PW50 Mobile Workboard Printer

- Four-inch PW50 complements Intermec CN3, CN3e and CK61 mobile computers.
- Convenient, integrated solution for DSD, Home Delivery and Field Service applications.
- Integrated DEX communications enable fast transaction processing and easy in-store system connectivity.
- Optional magnetic stripe and smart card readers.
- Easily transported or mounted in vehicle.
- Custom holders enable secure mounting or easy removal for scanning or data entry.
- Patented power management maximizes battery life for enhanced mobile productivity.
- High-speed electronics and high battery capacity ensure fast print speeds on the go.
- Integrated Bluetooth® and serial connectivity.

Media Supplies

- Comprehensive range of labels, tags, receipts and ribbons.
- Customizable label material, size and more.
- Support broad range of barcode printing applications and environments.

RFID Technology

Comprehensive suite of RFID systems, ranging from fixed, handheld and vehicle-mount readers, printers, tags, labels and inlays.

IP30

- Modular, passive UHF RFID handle reduces cost of adding RFID read/write capability to mobile computers.
- Support applications including warehouse operations, enterprise asset management, in-transit visibility, direct store delivery and exceptions handling.

IF61

- Powerful reader and network appliance.
- Deliver fast RFID processing with localized intelligence.
- Filter, store and manipulate information from tags before sending to server in required format - without a PC.
- Support applications written in Java, Microsoft C# and dot Net.

IF2

- Advanced performance in a compact and cost-effective design.
- Easily deployed and managed on common networks.
- Low cost per read point for superior ROI.
- Supports diverse passive UHF RFID applications in both enterprise and industrial environments.

IV7

- Intermec's first packaged forklift-mounted RFID reader system.
- Serial attachment to Intermec CV30 and CV60 vehicle mount computers, and the IA33 Antenna Cell.

RFID Tags, Inserts and Smart Labels

- Passive UHF RFID tags, inserts and smart labels.
- Receive, store and transmit digital information in multiple frequencies for global supply chain support.

Available RFID Printer models: PX4i, PX6i, PF2i and PM4i

Intermec Product Selection Guide

Automatic Identification and Data Capture Solutions

Computers

Designed to withstand today's toughest applications, Intermec® mobile and fixed or vehicle-mounted computers support myriad in-premise and in-field applications.

Mobile Computers

CS40

- Sleek, lightweight ruggedized compact design.
- Integrated 2D imager scans 1D/ 2D barcodes consistently delivering speed and accuracy.
- Built to withstand real-world handling with multiple 1.2-meter drops to concrete and IP54 sealing against rain and dust.
- 4 Radios, including 3.75G wireless WAN, 802.11b/g CCX v4, Bluetooth™ Class II version 2.1+EDR, and GPS technology.

CN50

- 3.75G wireless mobile computer with IP54 sealing and 1.5m (5ft) drop specification that delivers advanced, high performance voice and data communication capabilities.
- Integrated digital compass and GPS radio provide real-time directions that improve navigation for pedestrian and vehicle-based applications.
- Optional Enhanced Mobile Document Imaging (eMDI) enables easy capturing of high quality full-page document images while on the go.

CN4 | CN4e

- Integrated 3.5G wireless technology.
- Enable high bandwidth data collection and communication.
- Highly ruggedized IP64 sealing and 1.8m (6 ft) drop specification.

CK70

- 12% smaller and lighter than leading devices in the ultra-rugged class.
- Industry's fastest imaging engine delivering superior motion tolerance, laser aiming system, and optimized scanning angle for maximum productivity.
- Best in class battery life for longer run time. Suitable for courier express delivery.

CN3 | CN3e

- Lightweight rugged mobile computer built for the mobile worker. Integrated GPS and Bluetooth enable hands-free turn-by-turn voice navigation.
- Connect users with voice and high-speed data (GSM/EDGE or CDMA/EV-DO) wherever they go.
- CN3e offers ruggedized, enlarged keypad for intensive key-based data entry.

CN70/e

- Ultra-rugged and packed with cutting edge technologies for most demanding operations.
- Exceptional battery life for long device run time.
- Advanced barcode imaging technology with motion tolerance for snappy scanning and white illumination with laser aiming for high read rates.
- Brilliant display with extended life touch panel.

CK3

- Adapt easily to varied in-premise applications with extensive data collection and communication features.
- Eliminate need to deploy single-purpose devices to meet varied data collection and communication needs.
- Features include image capture, revolutionary imager-based scanning, speech and voice, and optional RFID capabilities.
- Support 802.11a/b/g and Bluetooth® radio communication.
- Easily scalable to fast-changing data capture and communication needs.

CK71

- 31% smaller and lighter than leading devices in the ultra-rugged class.
- Industry's fastest and farthest imaging engines delivering superior motion tolerance and barcode read range.
- Advanced power and battery management technologies extend device run time and reduce expense of replacement batteries.
- Dual band 802.11n radio for pervasive wireless coverage.

Fixed and Vehicle Mount Computers

CV30

- Compact, rugged fixed mount computer with full-screen footprint.
- Provides real-time wireless supply chain management at the dock, in the freezer, on the warehouse floor or in the yard.
- Choice of operating systems - Microsoft CE.NET 5.0 or Windows Mobile 5.0.
- Support RFID, speech recognition and voice capabilities with Cisco Compatible WiFi® and Bluetooth® connectivity.

CV60

- Full PC functionality.
- Provide real-time wireless supply chain management at the dock, in the freezer, on the warehouse floor or in the yard.
- Choice of wired or wireless accessories.
- Integrated Bluetooth™ cuts installation and parts replacement costs.
- Support Intermec Bluetooth printers and handheld barcode scanners.

Printers

Intermec's extensive range of fixed and mobile printers, and print media are designed to support all your printing needs, regardless of environment or application. Intermec Fixed Printers are available in four categories, namely: High-Performance, Mid-Range, Commercial and Desktop Printers; while its Mobile Printers for receipt and label printing come in both standard and rugged versions.

Fixed Printers

High Performance Printers

PX4i | PX6i

- Rugged, industrial-grade, high-performance printers.
- PX series includes PX4i and PX6i, with maximum print width of 4 and 6 inches respectively.
- Ideal for high volume on-demand printing and round-the-clock operations.
- Exceptional print quality and print speed of up to 12 inches per second.
- All-in-one, user-selectable printer languages - Fingerprint/ DirectProtocol (DP), IPL, ZSim and DSIm.
- Versatile form factor allows flexible mounting in any position.
- Standalone Smart Printing functionalities include accessing information directly from the network without a PC.
- Optional secured wireless connectivity with Cisco CCX and WiFi (WPA2) certification.
- Optional add-on includes automatic label applicator.
- Also available in RFID configurations.

Commercial Printers

PD41 | PD42

- Dependable, sturdy and versatile printer.
- Ideal for medium duty applications in manufacturing, transportation and warehousing environments.
- Best printing performance in its class, with crisp printing of variable-data labels at 150 mm/s (6 ips).
- Support industry-standard 200-mm (8 inch) rolls of labels and 450m (18 000 inch) of ribbon.
- Support paper media of varied thickness, and both ink-in and ink-out ribbon.
- All-in-one, user-selectable printer languages - Fingerprint/ DirectProtocol (DP), IPL, ZSim and DSIm.
- Graphical display eases user setup, configuration and fine-tuning without relying on host (for PD42 only).
- Optional secured wireless connectivity with Cisco CCX and WiFi (WPA2) certification.

Mid Range Printers

PF2i | PF4i

- Compact, industrial strength printer.
- PF2i and PF4i support labels up to 60mm (2.3 inch) and 114.3mm (4.5 inch) wide respectively.
- Standalone Smart Printing functionalities include executing user-defined programs without a PC.
- All-in-one, user-selectable printer languages - Fingerprint/ DirectProtocol (DP), IPL, ZSim and DSIm.
- Flexible media support: Standard label rolls, tear-off or label auto peel, and labels, tickets and tags in either roll or fan-folded format.
- Optional secured wireless connectivity with Cisco CCX and WiFi (WPA2) certification.
- Additional PF4i feature:
 - Interchangeable print head with choice of 203 or 300 dpi print resolution
- PF2i available in RFID configurations.

PM4i

- Smart, fast and network-ready industrial printer.
- Advanced secure network connectivity includes integrated Ethernet and five interface ports.
- Flexible wireless connectivity eases move to new locations when required.
- Interchangeable print head with choice of 203, 300 or 406 dpi print resolution.
- Standalone Smart Printing functionalities include executing user-defined programs without a PC.
- All-in-one, user-selectable printer languages - Fingerprint/ DirectProtocol (DP), IPL, ZSim and DSIm.
- Optional secured wireless connectivity with Cisco CCX and WiFi (WPA2) certification.
- Wireless option enables any attached peripheral devices to become part of wireless infrastructure.
- Also available in RFID configurations.

Desktop Printers

PF8

- Compact, sturdy and quiet printer.
- Available in direct thermal (PF8d) or thermaltransfer (PF8t) versions.
- Ideal for retail, office, service and healthcare setting.
- User-friendly setup with Connect to Print capability.

Mobile Printers

Mobile Receipt Printers

PB2 | PB3

- Highly-mobile and comfortable enough for all-day usage.
- Long-lasting, field replaceable batteries.
- Compatible with Intermec CN3/ CN3e, CN4/ CN4e, CN50, 700 and CK3 mobile computers.
- Ideal for DSD, route accounting, field service and retail queue busting.

Rugged Mobile Receipt Printers

PB21 | PB31 | PB51

- Fastest rugged mobile receipt printing performance.
- Meet Mil-Spec levels of durability and lightweight design.
- PB21/ 31/ 51 printers offer 2, 3 and 4-inch mobile receipt printing respectively.
- Print invoices, delivery receipts, service estimates, mobile point of sale receipts, inventory management schedules and sales orders on the go.
- Used as standalone printer or paired with mobile computers.
- Large memory store and optimized print mechanisms deliver 20 to 30% faster performance of complex graphics such as logos.
